METALWORKS EXPAND PRODUCTION; PUSH BRICK FACTORY CONSTUCTION

PRODUCES MORE METAL PARTS -- Ljubljana, Slovenski Porocevalec, 18 Nov 50

The "Remont" Enterprise in Ljubljana has metal factories in Skofja Loka, St. Vid, Trata, Poljane, Podsmreka, Vizmarje, and Vic. This year the factory in Vizmarje has produced various iron frameworks and crane tracks for the "Turboinstitut" (in Ljubljana), and various storage tanks. Last year the factory constructed a revolving furnace for the "Titan" Factory in Kamnik, while this year it has constructed conveyer belts, elevators, and the iron framework for the roof of the new foundry of the "mitan" Factory.

The factory in Skofja Loka produces cableways. Soon it will construct the prototype of a special crane for cableways, which was designed by Engineer Kostenapfl /sic/. The foundry of the "Remont" Enterprise manufactures molds for textile machinery and fire-resistant castings. The foundry in Podsmreka is making tests for casting chains for ships. The factory at Vic produces wooden and metal screws. It also produces special wire for shoe-making machines, which are being produced by a factory in Borovo. The electric machinery workshop in Trata constructs prototypes of electric machines and equipment. This year it has produced a transformer for a factory in Zrece and a battery-operated stove. The factories in St. Vid and in Ljubljana mainly produce small consumers' items.

DISCOVER NEW ORE DEPOSITS IN BOSNIA -- Ljubljara, Slovenski Porocevalec, 16 Nov 50

A prospecting team from the Geological Institute in Sarajevo recently discovered rich iron ore deposits near Gradina and Stara Rijeka and asbestos deposits beneath Ozren Mountain. Bosnian geologists are examining previously prospected lead, zinc, and silver ore deposits in the Javor Mountain area.

BUILDING OF BRICK FACTORY PROGRESSES -- Belgrade, Rad, 22 Nov 50

The building of cinder magnesite brick factory in the vicinity of Rankovicevo is progressing steadily. Thus far, a large shop in which furnaces will be installed, a shop for crushing ore, parts for revolving furnaces, and one storehouse have been completed. Two substations of the factory have been roofed already.
